To whom it may concern

Provision of Scaffolding Services on Sostanj Unit 6, 600MW coal fired power plant, Slovenia

The company Ramirent SA whose registered offices are at ul. Swierczewska 3, 71-066 Szczecin provided the scaffolding services on the Sostanj 600MW coal fired power plant in Slovenia. Ramirent SA have a framework agreement with both the Boiler and Plant scopes of Alstom to exclusively provide scaffolding services to Alstom and to Alstom subcontractor's on site. Ramirent SA were the sole providers of scaffolding services.

Ramirent SA have been present on the Sostanj site since February 2012 and have provided scaffolding services throughout the duration of the project until the present day. Currently the framework agreement between Alstom and Ramirent SA has been extended until the end of March 2015. To date Ramirent have provided approximately 250,000m³ of scaffolding to the project.

The site manager for Ramirent was Szymon Rambiert who is very co-operative and proactive in his approach. Under his management he ensured that the correct levels of materials and resources were available and that Ramirent SA provided an efficient and acceptable level of service.

Alstom would have no hesitation using the services of Ramirent in the future

Yours faithfully

Jan Turzynski
Project Consortium Contract Manager
Sostanj Unit 6
